**# Remarks**

1. The briefing session is compulsory.
2. Participants need to provide their availability on two service days. We will evenly allocate groups into two days. Besides distributing energy-saving light bulbs, participants would need to conduct interviews with the elderly to collect their opinions related to the physical and social environment. The data collected would be included in a published Research Project.
3. 2 groups of students in the same school will design a sculpture using the traditional light bulbs replaced on the two Service Days in accordance with our vision of the project. Prizes would be given to the team with the best design.
4. Students should act as Ambassadors and carry out a sharing session or other promotional activities at school (if possible) to get a certificate for the programme.
5. Sculptures made by students would be displayed in public site. Students are not compulsory, but welcome to be helpers during the exhibition period.
